# NWAKAEGO OWETE

"This course was exactly what I needed to find my way into the digital marketing industry. I was nervous before the bootcamp. Having a passion for all things digital, I decided to take a leap of faith and study digital marketing in-depth. I thought it would be like cramming for a test, but our trainers made it enjoyable.

This course has helped me learn everything I need to know about effective strategies in the field. We had lots of hands-on practice working on digital campaigns, lead magnets, CV and digital portfolio which came in handy after the bootcamp.

I now feel confident about my career as a digital marketer. The trainers were professional, engaging, and down to earth. I got away with a wealth of knowledge, understanding of how the digital marketing sector works and what is needed to engage on it.

I can honestly say, this course has been one of the best things I have ever done. I have found the structure of the course very well presented and it has given me a very good grounding for my future in Digital Marketing. The trainers are very knowledgeable and present their material in a fun, relaxed way"

# MAHEEN AHMED

"I went into Talent 2.0 with no prior knowledge or experience about digital marketing. At the end of it, I felt like a seasoned marketing professional. The amount of learning that is packed into this short course is like no other. I have developed a lot both personally and professionally and that wouldn't have been possible without the support of the staff who gave up their time and resources to put this together, and the participants on this course who are incredibly supportive of one another.

I would highly recommend this to anyone looking for a career change, wanting a healthy environment in which to grow and learn, and wanting to work within the exciting and fast developing industries of tech and IT."
